APPLICATION ARCHITECTURE

DATABASE

All classes from
our database
as java object

DAO

Link between database
and operation such as :
Select, Insert,
Delete, Update

APPLICATION ARCHITECTURE

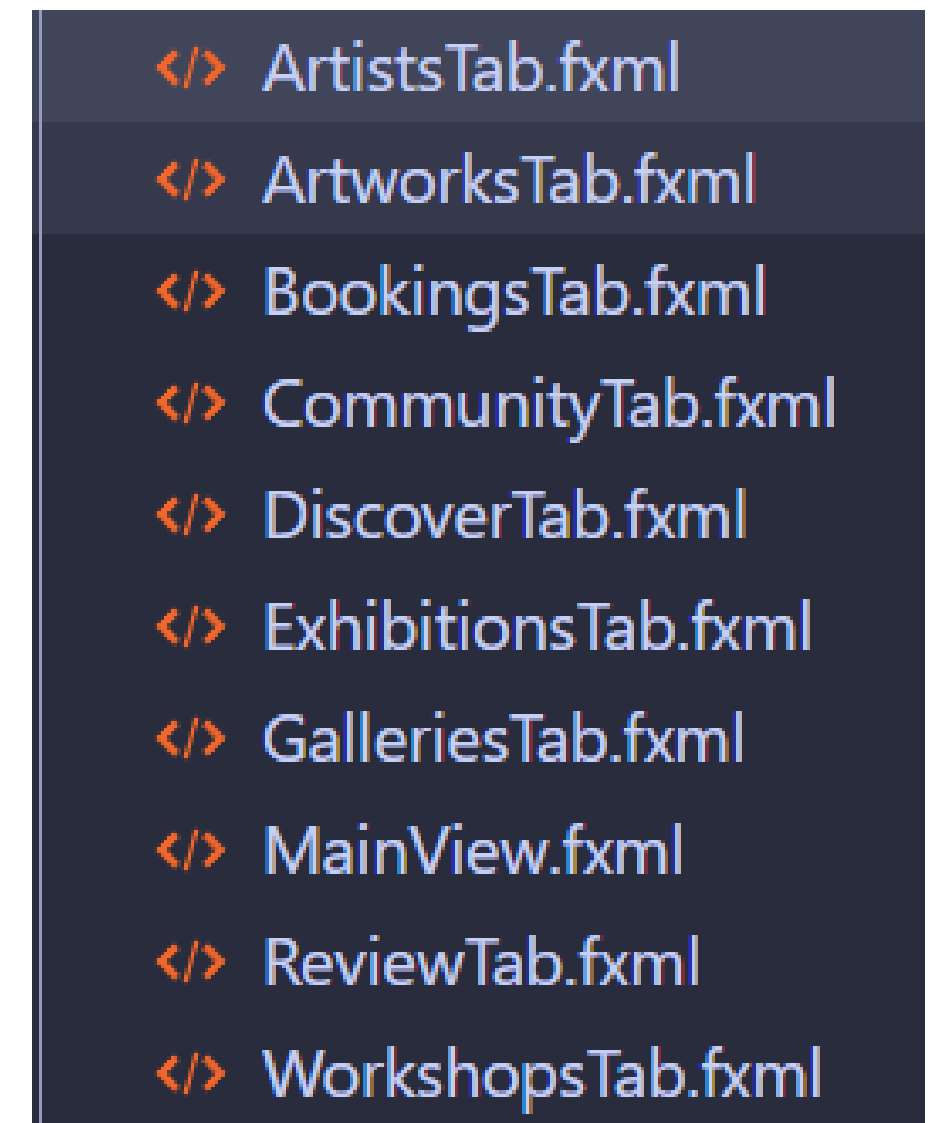

SERVICES (JDBC)

Process operation and
link DAO's and concrete
action

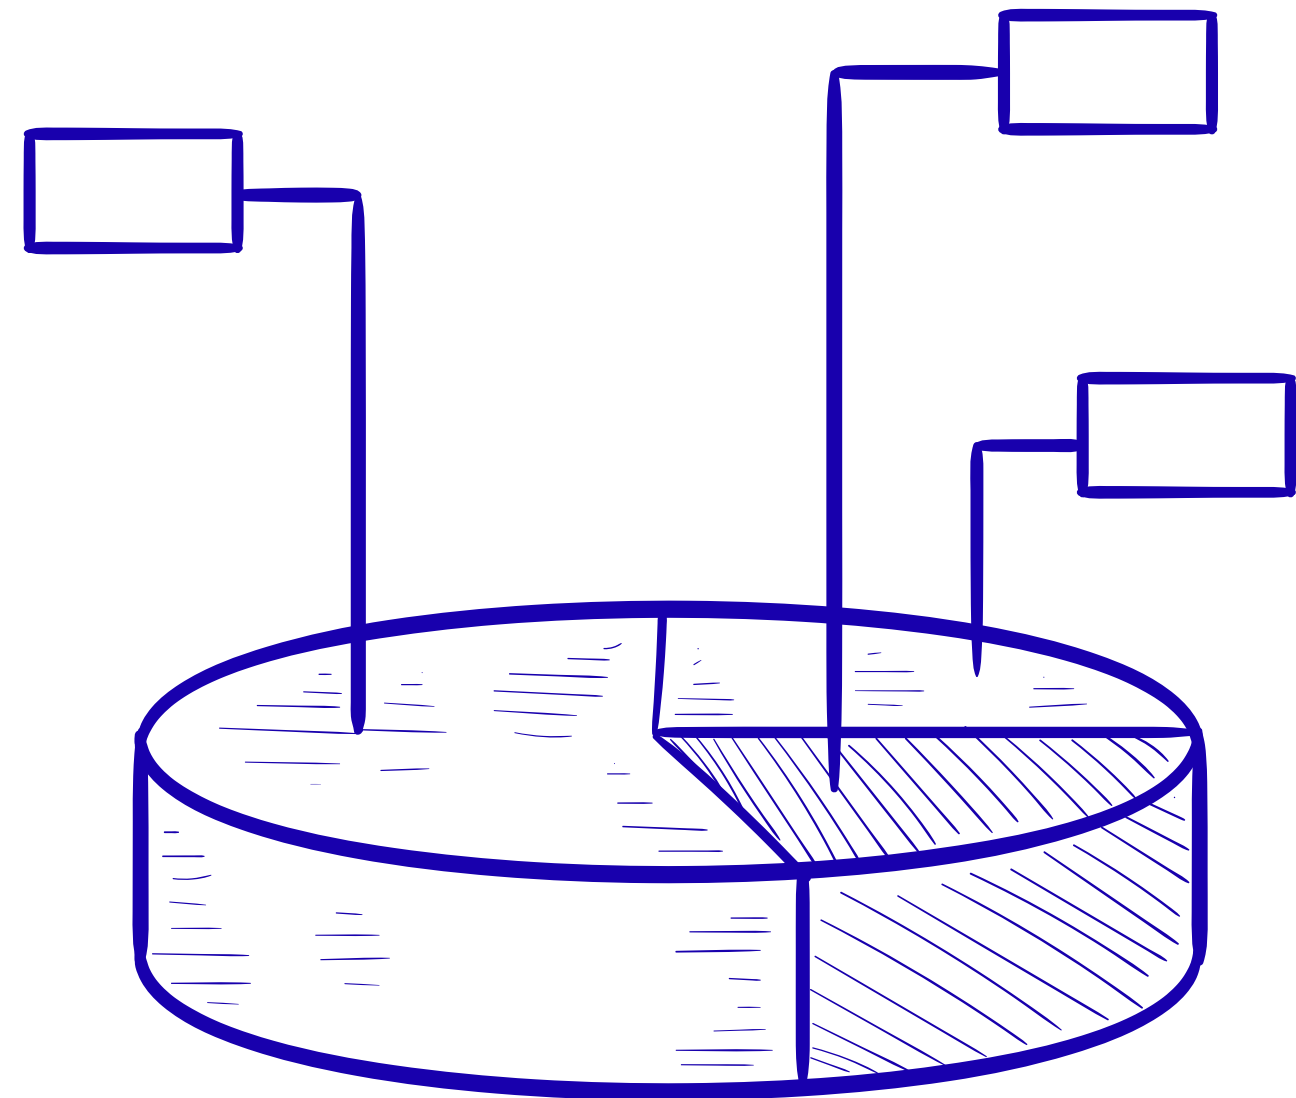

USERS INTERFACE

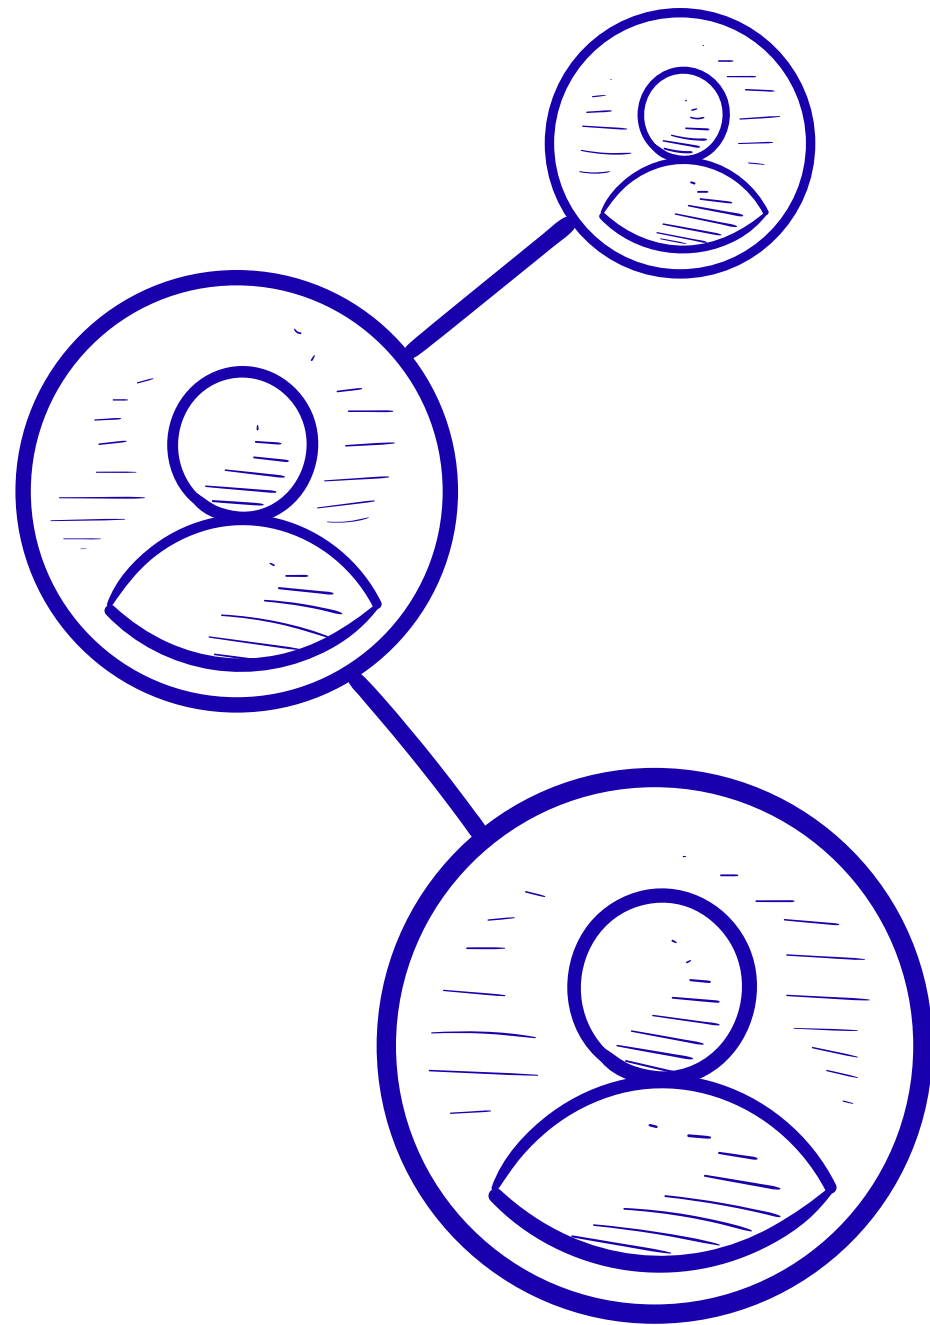

Ui files allow interaction
between the users
and the app

CHALLENGE ENCOUNTERED

- Work at the same time
- Understand and adapt our database with the code
- Working with a new language (xml)

CONCLUSION

- Managed to realize a complete project and add our classes
- Did a basic login page (unfortunately, no password/mail encryption)
